

**Mark Czaja**

Vice President, Chief Technology and Innovation Officer  
Parker Hannifin Corporation

Mr. Czaja began his career with Parker as an engineering trainee and in 1985 became a Product Design Engineer with the Control Systems Division. He was named Division Engineering Director in 2000. In 2004, he was promoted to Vice President of Technology and Innovation - Aerospace Group, where he had responsibility for engineering and product innovation across all Aerospace divisions and led the Group's focus on lean product development across a number of key platforms including flight control, hydraulic and fuel systems. Mr. Czaja was named Vice President of Technology and Innovation - Motion Systems Group in 2019.
